 + Lower Costs  
 + Guaranteed Quality  
 = **BETTER VALUE \$\$\$\$**

**SERVO:** Complete in-house repair • Machining • Balancing • Rewinding • Remagnetizing = Complete Control

**SPINDLE:** Complete Remanufacturing Services • Hard Chroming • Metal Spraying • Ceramic Coating • Precision Grinding • Custom Balancing • Part Re-manufacturing • Repair All Types of Spindles

Spindle Before

Spindle After

7,000 ft<sup>2</sup> dedicated to servo repair • 3,000 ft<sup>2</sup> dedicated to spindle repair • 4,000 ft<sup>2</sup> dedicated to training / education • 45,000 ft<sup>2</sup> dedicated to 3 phase motor repair • 18,000 ft<sup>2</sup> dedicated to customer motor storage and motor inventory management

- AC/DC Motor Repair and “Share the Spare” motor programs to prevent downtime.
- Visit <http://www.mcbroomindustrial.com> for complete information on repair service. Most every spindle and servo is supported.
- Free inspections (unless very complex) and cost estimates for your work authorization.
- Presentations at your facility to share our story and ability to partner with you.
- Continuous Employee Training, Innovation, and Development
- 70 years of customer satisfaction.
- Turnaround time measured in days not weeks.
- Warranty starts when part is placed in service, not while it sits on the shelf.
- **CALL Diecast Solutions to: Discuss further • Get your personal customer service rep • Get your spindle / servo submission form • Partner for a value oriented solution**
