

CONTACT Diecast Solutions for Furnaces

With the Strikomelter®, StrikoDynarad guarantees savings and performance so incredible your company cannot afford to \$\$\$\$\$\$ ignore the numbers \$\$\$\$\$\$.

Striko is the world leader in stackmelter technology. If your facility melts metal and operational costs are important to you, it is incumbent to investigate the features of this furnace.

- Striko will GUARANTEE a melt loss of only 1.5% when melting 50% ingot and 50% factory returns
- Proven energy consumption of 950 BTU/lb when melting 50% ingot and 50% factory returns
- At 16 hours a day - 250 days per year - \$0.80 per pound aluminum cost - melting 4000lbs/hour - if you reduce melt loss by 1% you save \$128,000 per year
- Based on the melting parameters above, reducing 100 BTU/hour will save \$17,600 per year
- What is your melt loss and BTU rate per hour? Can you afford to ignore it?

These numbers may be staggering. Striko makes no false claims. Your savings could be better. If they are 75% of the savings listed above, is that so bad? The payback and operational efficiencies demand a decision to be made. You can continue to leak money in your current operation or you can begin to put money in your pocket and compete in the marketplace. There is a reason all furnaces in Asia and Europe are stackmelters. Choose the Strikomelter® option.

- Strikomelters® for one machine, two machines, several machines or central melts and complete foundry support • Patented shaft geometry to minimize abrasion and maximize waste gas heating • 3 chamber design • Easy to clean • Separate melt and holding area • Multiple controls choices • Optimal metal quality • Zeeland, MI • Visit www.strikodynarad.com
